

LIGHTSPACE
CORPORATION

UNIQUE INTERACTIVE DANCE FLOOR

LIGHTSPACE DANCE

PRODUCT BROCHURE

GO DANCE

the a unique atmosphere that will make
you stand out from the crowd

LIGHTSPACE CORPORATION

Lightspace® provides cutting edge interactive lighting and entertainment products to numerous industries including Nightclubs, Fashion Shows, Architectural Lighting & Design, Special Events, Theme Parks, Stage Lighting & Sound, Family Entertainment Centers, and Health Clubs.

The Lightspace® patent pending technology creatively engages and interacts with people to immerse them in a new experience of interactive visual and audio effects enhancing their overall enjoyment as they dance, play, workout and generally have fun.

WHAT IS LIGHTSPACE DANCE?

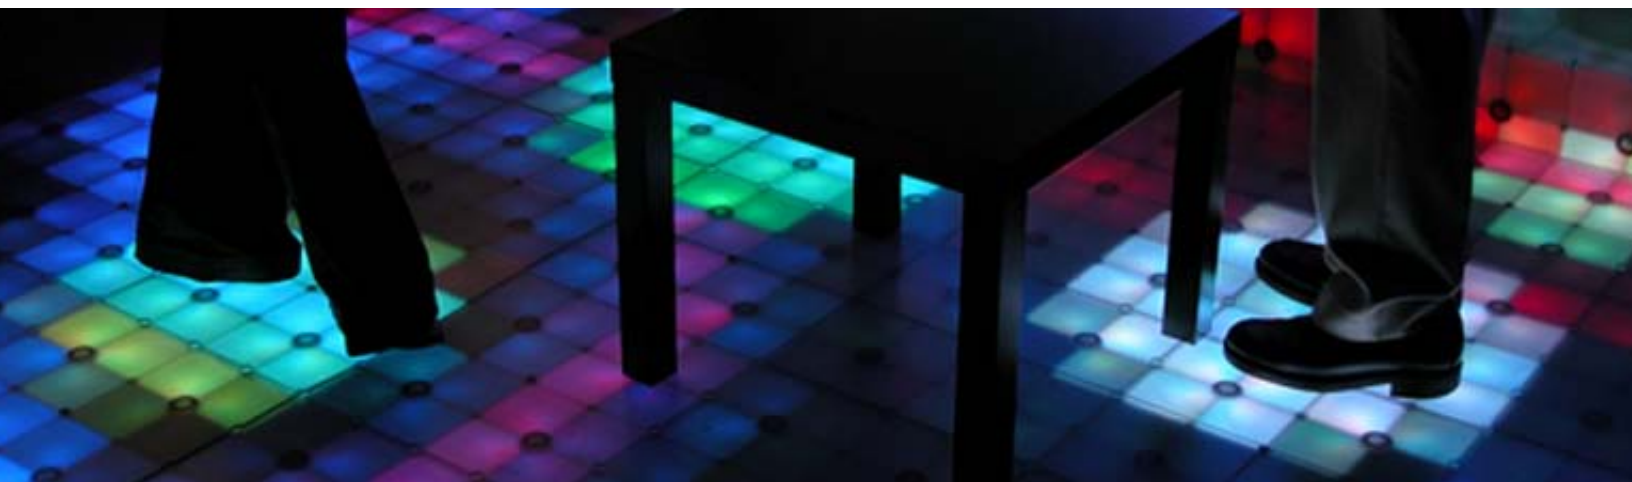

*UNIQUE
PARTY
ATMOSPHERE*

Whether you are the area's trendiest techno club, the hippest hip-hop hot spot, or the must-have event planner, Lightspace® Dance will give your customers a unique party atmosphere that will make you stand out from the crowd. Our L.E.D. and pressure sensing interactive lighting and effects platform can even integrate with your existing lighting and sound systems, immersing partiers in an electric and highly engaging visual and sensory experience.

Lightspace® Dance is comprised of adaptive, highly programmable and interactive tiles that can be assembled together to form any size or shape floor and/or structure based on your needs. This enables club owners and event planners to transform static décor into a stimulating environment that responds to customer movements wherever they happen to be moving - on a dance floor, a stage, a VIP lounge, a dance cube or a custom structure.

At the heart of Lightspace® Dance is the Lightspace® Management System (LMS). With the LMS, DJs and VJs have complete control over the floor so they can effectively integrate the surface or structure into their current routine or use it to create a totally new and immersive experience to support changes to nightly themes or draws.

By fusing light, sound and physical movement, Lightspace® Dance promotes a unique and adaptable ambience that encourages repeat attendance and supports numerous branding and revenue opportunities.

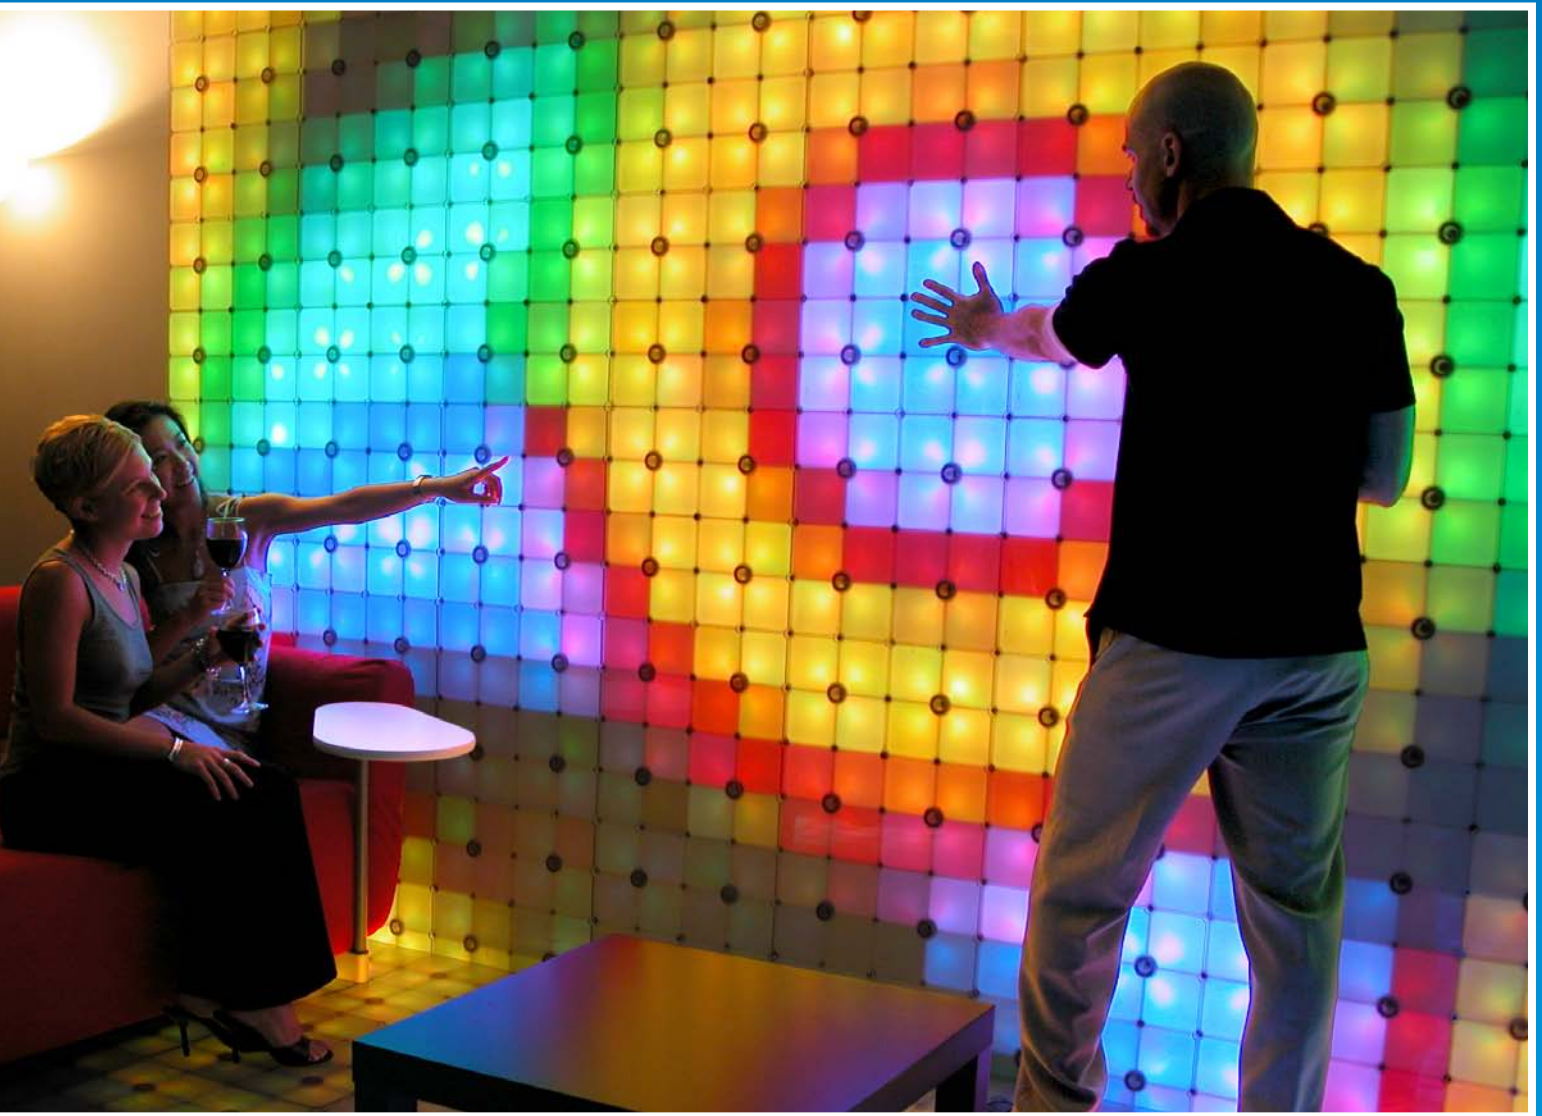

Easily adaptable and never obsolete.

Lightspace® Dance systems will never become stale or outdated as they can be easily updated with new interactive effects packages. New features and functionality can be added through the use of plug-ins which allows DJs and VJs to customize their system based on their specific needs and their clientele's tastes. Lightspace® Dance is so customizable that the same floor or structure can be used to support various nightly events, changing audiences and themes.
